

ADEBOWALE DAVID AYOMIDE

Data Analyst | Economics Graduate

Lagos, Nigeria | 09122903168 | davidadebowale113@gmail.com | [LinkedIn Profile](#)

PROFILE

Data Analyst and Economics graduate (Crawford University) with hands-on training in Python, SQL, Power BI, and Advanced Excel, combined with a strong foundation in applied econometrics. Completed an ARDL-based research project analyzing exchange rate dynamics and economic growth in Nigeria, and gained practical experience in financial administration and inventory operations through leadership roles in a student economics association. Seeking entry-level Data Analyst opportunities where analytical rigor and clear reporting drive better decisions.

EDUCATION

B.Sc. Economics (Econometrics & Statistics Focus)

Crawford University

Second Class Upper Division (2:1) • Expected Graduation: 2026

Relevant Coursework: Econometrics & Statistics, Microeconomics, Macroeconomics, Public Finance, International Economics, Development Economics, Research Methods

TECHNICAL SKILLS

Python (Data Analysis), SQL, Power BI, Advanced Microsoft Excel, Econometric Analysis (ARDL / ECM)

EXPERIENCE

Financial Secretary | Nigerian Economics Students Association (NESA), Crawford University 2024 – 2025

- Managed dues, records, and financial transactions for an association of 150+ members, maintaining accurate and auditable financial records.
- Prepared and presented periodic financial reports to executive members, and conducted budgeting and internal audits for association funds.
- Sourced and managed funding for major association events, including the annual dinner and induction ceremony.

IT Student (Inventory Support) | Cway

July 2025

- Tracked and managed inventory records for stock covering 150+ items using Microsoft Excel and an internal inventory management system.
- Supported IT and operations teams with data entry, stock reconciliation, and inventory system maintenance to improve record accuracy.

DATA ANALYSIS PROJECT

Exchange Rate Fluctuation and Economic Growth in Nigeria (1980–2024)

- Applied the ARDL bounds testing approach and Error Correction Model (ECM) to analyze the long- and short-run effects of exchange rate, inflation, interest rate, oil price, and trade openness on Nigeria's GDP growth.
- Found that exchange rate depreciation, inflation, and high lending rates significantly reduced GDP growth, while oil price and trade openness had significant positive effects (model $R^2 = 0.87$).
- Established a stable long-run equilibrium (F-statistic = 6.52) with an adjustment speed of 60% per year, and translated findings into policy recommendations on exchange rate stabilization and economic diversification.

CERTIFICATIONS

- Certificate of Training – Graduate Finishing Program (2025)
- Certificate of Membership (Associate Member) – Nigerian Economic Society (NESA)
- Certificate of Attendance – 8th International Learned Conference: "Poverty, Instability, and Monetary Policy Intervention in a Democratic System"
- Certificate – Jobberman "Build Career for Workplace Success" Training
